RE: NON-COMPLIANCE CITATIONS ON JANUARY 23, 1987 AT FIDELITY MINE #11

Dear Mr. Ryan:

As a result of your agency's field observations on January 23, 1987 and subsequent letter dated January 28, 1987, please be advised that our company has taken measures to ensure that all surface drainage from affected lands in the Kathleen Field area will pass through our approved sedimentation pond prior to leaving the facilities.

The road fill across the bottom land area in the southwest portion of our permit area has been completed as approved in Revision #1 to Illinois Department of Mines and Minerals Permit #174. A copy of Revision #1 was submitted to your agency January 23, 1987 with a request that surface drainage plans contained therein also be approved by your agency. Map D of Revision #1 illustrates the proposed drainage facilities, including channel, pipe and road fill locations, that will be utilized to direct surface drainage into the approved sediment pond.

If further information is needed by your agency on this matter please contact me at telephone number 618-542-5875.

Sincerely,

William E. Smith
